

Empowering Agencies with Advanced Cybersecurity Services

Kai Secure is an 8(a) NHO Joint Venture between
Malama Kai Technologies & IPSecure, Inc.

Our Hawaiian Roots

At the core of Kai Secure are principles rooted in Hawaiian culture. We believe in empowering others, fostering a sense of community, and protecting what is valuable. We ensure that our services not only meet the highest standards of excellence but also resonate with our cultural values, creating a unique and powerful approach to cybersecurity.

Join us in our mission to protect vital resources with advanced cyber services. Navigate the complexities of cybersecurity with a trusted partner who values community, culture, and cutting-edge technology.

Our Mission

At Kai Secure, our mission is to safeguard critical infrastructure and sensitive data by delivering cutting-edge cybersecurity solutions. We are committed to providing proactive defense strategies and staying at the forefront of cyber threats to ensure the utmost security for our clients.

Our Vision

Our vision at Kai Secure is to create a secure digital environment where organizations can thrive without the fear of cyber threats. We aspire to set new benchmarks in cybersecurity excellence and contribute to a safer online ecosystem for businesses and government entities.

Technology

At Kai Secure, we harness the power of state-of-the-art technologies to develop robust cybersecurity frameworks. Our focus on innovation and continuous improvement enables us to adapt to emerging cyber challenges and provide unparalleled protection to our clients.

Our Services

1

Test, Range & Engineering Services

- Network and System Integration & Management
- Solutions Architecture & Network Engineering
- Training & Exercise Development
- Weapon and Mission System Development & Testing
- Cyber Range Support, Modernization & Development
- TEMPEST Emanations Testing

2

Cybersecurity Services

- Defensive & Offensive Cyber Operations
- ICS/SCADA Solutions
- Incident Response & Coordination
- Cybersecurity Engineering
- Penetration Testing
- Cyber Operations & Coordination
- Unified Capabilities

3

Requirements & Software Development

- Defensive & Offensive Tool Development
- Development Security Operations
- Application Modernization, Development & Virtualization
- Malware Analysis & Reverse Engineering
- Requirements Development & Processing
- Database Development & Design

4

Risk Management, Authorizations & Assessments

- Policy Development, Management & Design
- Security Control Assessment
- Threat, Risk & Vulnerability Management
- Governance & Compliance
- Information Assurance
- Risk Management Framework
- Intelligence Capabilities

We offer a comprehensive range of services designed to meet the unique needs of our clients

Streamlining the Acquisition Process

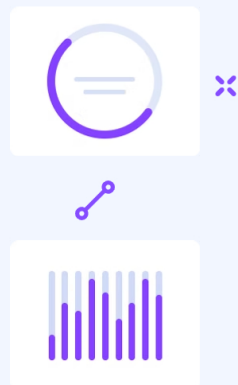

Kai Secure: a Native Hawaiian Organization

As a Native Hawaiian Organization (NHO) owned 8(a), Kai Secure offers several advantages, including the ability to receive directed, sole source, non-competed contract awards from Federal agencies. This includes the ability to receive Department of Defense (DoD) sole-source contracts up to \$100M without the requirement for a Justification and Approval (J&A). Kai Secure offers significant time and cost savings to the Government's contracting process.

NHO Procurement Advantage

- Solutions to meet 8(a) and Small Business goals; 13CFR124.110(c)
- Faster procurement via Alpha contracting, which enables contracting officers to work jointly with us prior to solicitation, reducing procurement time and streamlining the contract process
- 8(a) Sole source awards that cannot be protested; 13 CFR 124.517(a)
- No contract ceilings for our 8(a) companies as we are exempt from competitive thresholds; 13CFR124.506(b)(2)
- Alpha contracting process used in direct award negotiations: Per FAR 6.303-1(b), 8(a) DoD sole source awards can be issued up to \$100M with no justification required.

Our Approach

Agile

Agility is at the core of our cybersecurity philosophy. We prioritize swift responses and proactive measures to mitigate risks and vulnerabilities, enabling our clients to navigate the digital landscape with confidence and resilience.

Adaptive

At Kai Secure, we adapt our cybersecurity strategies to align with the dynamic nature of cyber threats. Our solutions are designed to evolve and respond to new attack vectors, ensuring comprehensive defense for our clients' digital assets.
